

Issuance & Consumption Knowledge

Material consumption by department, machine and job

Purpose for the AI Assistant

Lets the assistant analyse what materials were consumed from stores, by which department, machine and job, and at what cost – the basis for consumption trends and cost analysis.

1. Source & structure

Files	IssuanceDetail__11_.xls; IssuanceDetail__12_.xls; IssuanceDetail__13_.xls; IssuanceDetail__14_.xls; Issuance_Detail_Report-1.xls
Total rows	50,711
Date range	2025-07-28 to 2026-07-13
Authoritative value field	TotalPric
Columns	IssuanceCode, Branch, Department, IssueToOthers, AuthorizedBy, IssuedBy, ReceivedBy, Description, RefNo, Demand RefN, Item, Specification, GroupName, MaterialStandard, UOM, ItemCode, Material, Quantity, Weight, Status, FromDate, UnitPrice, TotalPric, SerialNo, Machine, Category, JobNumber

Consumption value rule

Consumption value = sum of **TotalPric**. The assistant never recomputes Quantity × UnitPrice – TotalPric is authoritative and already reflects the issued value.

2. Consumption position

Metric	Value
Total issued value (window)	PKR 3,522,817,955
Issuance lines	50,711

Top consuming departments (by line count)

Department	Lines
Production	10,333
Fitter	7,315
Fabrication	4,368
Workshop	3,173
Welding	2,671

Department	Lines
Maintenance	2,412
Boring Section	2,186
IPPC	2,099

Top categories consumed

Category	Lines
Cutting Tools	7,829
Health & Safety Items	6,900
Refractory Material	5,590
Raw Materials & Alloys	4,621
Plate Material	3,791

3. What each record tells the assistant

- Branch, Department and Machine – where consumption happened.
- JobNumber – links consumption to a production/export job for costing.
- AuthorizedBy / IssuedBy / ReceivedBy – accountability trail.
- IssueToOthers & 'Sale To ...' in Description – inter-company transfers.
- FromDate – enables monthly/quarterly consumption trends.

4. Consumption KPIs

- Consumption value by department / machine / job / category.
- Monthly consumption trend (rising vs falling).
- Top-consumed items and their stock coverage.
- Consumption vs purchase (are we buying what we burn?).
