Business Terminology Dictionary

Supply-chain, ERP and context-dependent terms

Purpose for the AI Assistant

The controlled vocabulary the assistant uses to map everyday employee language to exact database fields and the correct interpretation – including terms whose meaning changes by department.

1. How to read this dictionary

Each term lists its business meaning, owning department, the database field(s) it maps to, a sample user question, and how the assistant should interpret it. Context-dependent terms are marked.

Term	Dept	Meaning	DB field(s)	Example question	Interpretation
Available Stock	Stores	Usable inventory on hand.	Available Qty / Available Amoun	How much X can we issue?	Use Available Qty, not StockQty.
Hold Stock	Stores	Blocked/reserved, not usable.	Hold Qty	Why can't I issue X?	Hold Qty > 0 explains the shortfall.
Inventory Value	Stores	Financial worth of usable stock.	Available Amoun (PKR)	What is our stock worth?	Sum Available Amoun; never qty×price.
Reorder Level	Stores/AB	Minimum before replenishing.	Reorder Level	What needs reordering?	Flag Available Qty < Reorder Level.
Critical Item	Stores/AB	High-risk of stockout.	AB_Items 'Critical' sheet	Which items are critical?	43 items; combine with lead time.
Safety Stock / Days	AB	Buffer to absorb variability.	Safety Stock, Safety Days	How much buffer for X?	Compare on-hand to safety stock.
Stock Health	AB	Stock-days coverage ratio.	AB_Items 'Stock Health'	Is X healthy?	Low/zero → reorder/critical.
Consumption / Issued	Issuance	Material issued from stores.	TotalPric (value)	What did dept X consume?	Sum TotalPric; never recompute.
TotalPric	Issuance	Authoritative issued value.	TotalPric	Value of issues?	Use as-is.
Purchase Value	Purchase	Value bought via POs.	Amount	What did we spend?	Sum Amount.
Supplier Delay	Purchase	Late vs required date.	Purchase Date – Required Date	Which suppliers are late?	Positive gap = late.
Lead Time	Purchase/I mport	Time from need to delivery.	Lead Time cols / Lead Time Days	How long to get X?	Longer → higher stockout risk.
MOP	Purchase	Mode of payment.	MOP (Credit/Cash/Advance)	How was PO paid?	Cash-flow context.
LC / ALC / ELC	Imports	Letter of Credit (& amended/established).	LC / ALC Tracker	LC status of shipment?	Payment-instrument stage.

Term	Dept	Meaning	DB field(s)	Example question	Interpretation
On Water	Imports	Shipment at sea (In Transit).	Current Status = In Transit	How many on water?	Count In Transit shipments.
Sailing	Imports / Logistics	CONTEXT-DEPENDENT vessel-departure status.	Import: inbound status / Logistics: Sailing Date	How many are sailing?	Imports = inbound at sea; Logistics = export departed Karachi.
ETA / ETD	Imports/Logistics	Est. arrival / departure.	ETA chain, ETD Karachi	When does X arrive?	Latest ETA; slippage = delay.
ETA Works	Imports	Arrival at Qadri site.	ETA Works	When at our works?	Post-clearance arrival.
BL	Logistics	Bill of Lading.	BL Status	Is BL ready?	Doc-readiness for export.
GD	Logistics/Imports	Goods Declaration (customs).	GD File / GD No	Customs filed?	Clearance progress.
POD	Logistics	Port of Discharge.	POD / Port of Destination	Where does it land?	Destination port.
Incoterm	Logistics	Delivery/risk terms.	Incoterm / Shipping Term	Who pays freight?	e.g. CFR, FOB.
Requisition	Stores/Procurement	Internal demand for material.	Store Requisition rows	What's demanded?	Pre-purchase demand.
Pending Quantity	Procurement	Requisitioned but not yet fulfilled.	Pending Quantity	What's outstanding?	> 0 = open demand.
Urgent Requirement	Procurement	Priority demand.	Urgent flag	Any urgent needs?	Prioritise these.
Delay (Logistics)	Logistics	Late arrival of export.	Actual Arrival – ETA	Is shipment late?	Positive = late.
Branch	All	Legal entity / plant.	Branch (name) / code (QE, QEN, QCL, QB2)	Show X for QCL.	Map code↔name.
Job Number	Issuance/Logistics	Production/export job ref.	JobNumber / Job #	Cost of job X?	Aggregate by job.
