

05 / IMPORTS

Imports Knowledge

LC process, shipment status, on-water tracking and ETA

Purpose for the AI Assistant

Lets the assistant track international procurement – where each shipment is in its lifecycle, what is on water, expected arrivals, and import value and delay exposure.

1. Source & structure

File	Import_Status_Sheet-2026.xlsx
Ongoing shipments	197
Main working sheets	On Going, Import Status, Arrived, ALC Tracker, Financial Summary, Financial Forecasting
ETA chain	ETD → 1st ETA → 2nd ETA → 3rd ETA → 4th ETA → ETA → ETA Works

2. Import lifecycle (status values)

Current Status	Shipments	Stage meaning
Under Production	84	Supplier still manufacturing
In Transit	50	On water / on the move
Ready Awaiting Sailing	29	At origin port, vessel not departed
T/T in Process	9	Telegraphic transfer / payment stage
Arrived at Works	9	Delivered to Qadri site
LC in Process	7	Letter of Credit being opened
On Road	4	Cleared, in local transport
Costing in Process	3	Landed-cost being finalised

'Sailing' vs 'On Water' vs 'Ready Awaiting Sailing'

Ready Awaiting Sailing = at origin port, vessel not yet departed. **On Water / In Transit** = Shipment has departed supplier and is at sea (In Transit). Distinct from 'Ready Awaiting Sailing' (still at origin port). In the import context 'sailing' refers to the vessel-departure status of an inbound shipment.

3. Supplier countries

Country	Shipments
China	160

Country	Shipments
Turkey	17
UAE	7
USA	7
Sweden	3
South Africa	1
Italy	1

China dominates the import base, which concentrates country risk (policy / customs changes affect a large share of shipments at once).

4. Key import terms

LC	Letter of Credit – bank instrument guaranteeing payment to the foreign supplier.
ALC / ELC	Amended / Established LC – tracked in the ALC Tracker sheet.
ETD / ETA	Estimated Time of Departure / Arrival; multiple ETAs record slippage.
ETA Works	Expected arrival at the Qadri site (after port clearance).
On Water	Shipment at sea between origin and destination port.
Under De-Stuffing	Container being unloaded after arrival.

5. Import KPIs

- Count and value of shipments on water.
- Shipments by status / country.
- ETA slippage = latest ETA – first ETA (delay trend).
- Import value in transit (capital exposure at sea).
- Shipments approaching or past ETA Works.
