AI Test Questions

Realistic employee questions for validating the assistant

Purpose for the AI Assistant

A benchmark set spanning descriptive, diagnostic, forecasting and predictive questions. Each entry gives the department, required tables, expected logic and answer type – usable directly as RAG evaluation cases.

A. Descriptive – 'What happened?'

Q1. What is our current available stock value?

Department	CEO / Stores
Required tables	Stock (4 branch files)
Expected logic	Sum Available Amoun across branches.
Answer type	Single figure in PKR + optional branch split.

Q2. How many items are on water right now?

Department	Imports
Required tables	Import Status (On Going)
Expected logic	Count shipments with Current Status = In Transit; sum value.
Answer type	Count + value summary.

Q3. How much did the Production department consume this year?

Department	Stores / Finance
Required tables	Issuance
Expected logic	Filter Department = Production; sum TotalPric.
Answer type	PKR total + trend note.

B. Diagnostic – 'Why did it happen?'

Q4. Why are some suppliers delayed?

Department	Procurement
Required tables	Purchases
Expected logic	Compute Purchase Date – Required Date; rank suppliers by avg delay.

Answer type	Named suppliers + delay days + cause note.
--------------------	--

Q5. Why did inventory value increase?

Department	Stores / Finance
Required tables	Stock + Purchase + Issuance
Expected logic	Compare purchases in vs issues out over period.
Answer type	Net movement explanation.

Q6. Why is item 19981-60 becoming critical?

Department	Stores
Required tables	AB_Items + Issuance + Stock
Expected logic	Low Stock Health + rising 3M issuance + no incoming stock.
Answer type	Root-cause in 3–4 lines.

C. Forecasting – 'What is expected?'**Q7. What will next month's requirement be for weld materials?**

Department	Procurement
Required tables	AB_Items + Issuance
Expected logic	Use Upcoming Month Forecast / Issuance 3M average by category.
Answer type	Forecast qty/value.

Q8. Which materials may require purchase soon?

Department	Procurement
Required tables	AB_Items + Stock
Expected logic	Stock Finish Date near-term & Stock In Transit insufficient.
Answer type	Prioritised item list.

D. Predictive & decision-support – 'What action / risk?'**Q9. Which materials may go out of stock?**

Department	Stores / CEO
Required tables	AB_Items
Expected logic	Stock Days below lead time; Critical sheet (43 items).
Answer type	Ranked risk list + recommended action.

Q10. Which suppliers create production risk?

Department	Procurement / Directors
Required tables	Purchase + AB_Items + Import
Expected logic	High delay + supply of critical/imported items + spend concentration.
Answer type	Named suppliers + risk rationale.

Q11. Which items should be prioritised for procurement?

Department	Procurement
Required tables	AB_Items + Requisition + Import
Expected logic	Critical + high pending demand + long lead time + not in transit.
Answer type	Top-N action list.

Q12. Are any export shipments at risk of late arrival?

Department	Logistics
Required tables	Logistics (Shipment Master)
Expected logic	Actual Arrival vs ETA; open BL/doc status.
Answer type	Flagged shipments + reason.

Expected answer style (all questions)

Professional, concise, decision-oriented, 3–4 lines. Example: “The current available stock value is PKR 860.4 million. Critical shortages exist in 43 items across categories. Several suppliers have delivered beyond required dates. Immediate procurement review is recommended.”
